

Lesson 2: Climate

Directions: Answer the following questions on the lines provided. You may use your textbook.

1. How are weather and climate alike? How are they different?

2. Summarize the cycle of water from oceans, rivers, streams, and lakes into the air and back to the sea.

3. What three major factors affect the climate of a place?

4. Identify and describe four basic types of climates and give an example of each.

Notes for Home: Your child learned about the climate of the United States.

Home Activity: With your child, create a chart to record the weather in your community for a week. Discuss any climate patterns you see.
